MeetMaker Registration Instructions

MeetMaker has linked with the AAU National office to verify numbers for all athletes and coaches entering an AAU event on MeetMaker. Please check the following information.

First Name
Last Name
Date of Birth
AAU Number

These must appear in MeetMaker just like they are in the AAU database as if the names are spelled different, they will not match up in the verification. (exp. Elizabeth Smith in AAU CANNOT be Lizzy Smith in MeetMaker will not match up to verify).

Gymnast must be verified before payment can be made for the gymnast, if a gymnast comes back as invalid, they will be highlighted in RED. You can uncheck this gymnast enter the others then edit this gymnast to enter them at a separate time (or you can back out edit these gymnasts then restart the registration process)

Coaches can enter if they are not verified, you will be told they are not valid. If they are invalid at time of registration the meet director will have a list of all invalid coaches, once the coach becomes verified, they will be removed from the meet directors list. (verification for back ground checks is included in this)

You can manually enter your roster or use the import CSV file, please email jason@meetmaker.com for this file, I have also sent it to DeShaun. Please read the directions [below] as if the file is not filled in and SAVED properly it will not upload. (ALWAYS check all uploaded gymnast before entering and paying)

To Import the AAU roster, use the CSV form AAU Gymnast Import

The import matches First Name, Last Name, Date of Birth and Organization number. If these are ALL, the same it will update that gymnast. If ONE of these fields are different it will make a new roster entry (if the Organization number is different it will look like a copy but with different numbers) If you have an existing roster and the import will have new numbers, you will need to delete any existing gymnast on your roster that have different numbers or DOB or Name spelling from your import.

Open the CSV form in a spreadsheet program

Fill in the information that the example line has listed (do not delete any of the columns)
